PROFESSIONAL SUMMARY

Game Technology undergraduate driven by a passion for using interactive design to solve real social problems, currently channelling that drive into **Escape the Debt**, an RPG-based serious game built in Unity to grow financial literacy among Malaysian young adults navigating PTPTN, credit card, and BNPL debt. Backed by hands-on industry exposure in QA automation, web development, and database systems, he is motivated to build technology that is both technically sound and genuinely useful to the people who need it.

EDUCATION

Bachelor of Information Technology (Game Technology) 2023 – Present
Universiti Teknikal Malaysia Melaka (UTeM)
Year 3, Semester 2 | CGPA: 3.01

Diploma in Digital Technology Graduated 2022
Politeknik Mersing
Dean's List — 2 Consecutive Semesters
CGPA: 3.56

SKILLS

Languages	C / C++ • Python • Java • C# • PHP • SQL • HTML • CSS • JavaScript
Frameworks	Django • Bootstrap 5
Databases	MySQL • SQL Server • Oracle Database
Game Dev	Unity 6 (URP, VR/XR) • Buildbox • Game Design • UI/UX Flowboarding
Web & Tools	Adobe Dreamweaver • Codelobster • Brackets • Dev C++
Networking	Packet Tracer • Computer Networking Fundamentals
IoT	Arduino • Internet of Things Concepts
OS & Office	Ubuntu Linux • Microsoft Office (Word, Excel, PowerPoint)
Soft Skills	Team Leadership • Analytical Research • Planning & Organisation • Multilingual Communication

LANGUAGES

English (Professional) • Bahasa Malaysia (Proficient) • Tamil (Native) • Malayalam (Conversational)

WORK EXPERIENCE

Marketing Executive

Mar 2022 – Oct 2022

SVC Global (Astro Broadcast Affiliate) — Full-Time

- ▶ Designed and developed a full company/business website using HTML, CSS, and JavaScript as a key deliverable within the first months of employment.
- ▶ Handled marketing operations and client-facing communication for an Astro broadcast affiliate.
- ▶ Managed marketing materials and coordinated promotional activities to support the company's sales pipeline.
- ▶ Transitioned to part-time remote support in the final months, continuing digital marketing and website maintenance duties.

Industrial Training Intern — QA Department

Mar 2022 – Jul 2022

Top Glove Sdn. Bhd. (TGWSB HQ)

- ▶ Built a Blind Test System as the primary internship project using Python (Django framework), Bootstrap 5, and MySQL, automating a previously manual QA testing process.
- ▶ Performed database data entry, management, and maintenance to support the QA department's reporting and tracking workflows.
- ▶ Assisted in several internal system development tasks, gaining exposure to enterprise-level software workflows.
- ▶ Operated within the Quality Assurance department of the world's largest rubber glove manufacturer, adhering to strict quality and safety standards.

Admin & IT Assistant

[Sep 2021] – [Mar 2022]

SVC Tuisyen Centre

- ▶ Handled administrative operations including student record management, scheduling, and fee collection.
- ▶ Performed IT and computer-based tasks to maintain and update records using office software systems.
- ▶ Served as front-of-house contact, developing strong communication and organisational skills.

Warehouse Associate (Short-Term)

[Jul 2019] – [Jul 2019]

Ceva Logistics

- ▶ Performed picking, packing, and sorting of goods in a high-volume warehouse environment.
- ▶ Developed attention to detail and ability to work efficiently under time-pressured conditions.

PROJECTS

Escape the Debt — RPG-Based Serious Game for Debt Management Awareness — Unity 6 (URP), C#

- ▶ Final Year Project: designing and developing an RPG-based serious game to enhance debt management awareness among Malaysian young adults, covering PTPTN loans, credit card compounding interest, and BNPL schemes through escape-room style puzzles.
- ▶ Built core gameplay systems including an Income meter, Debt meter, Pending Instalments meter, and DebtTicker to simulate realistic financial consequences.
- ▶ Designed three themed levels (PTPTN Office, Credit Card Dungeon, BNPL Shopping Trap), each translating a real debt mechanism into an interactive puzzle, such as a compound-interest simulation device and a balance-scale repayment decision.
- ▶ Developed supporting UI systems including a colour-coded inventory ('Kayal Organizer'), an in-game HUD with stress-level feedback, and a Results scene for educational debrief.

Wheel of Consequences — VR Educational Quiz Game — Unity, C#, PC VR (Oculus / SteamVR)

- ▶ Served as Game Designer in a 4-person team developing a single-player VR edutainment game for the UTeM Workshop II module.
- ▶ Designed the Phase-Based Progression system — players complete all questions in a difficulty tier (Easy / Medium / Hard) before advancing, with branching UI offering progression or menu return.

- ▶ Defined the full Reward & Penalty scoring logic, including point values for correct answers and deductions for wrong answers or 10-second timer timeouts.
- ▶ Curated the question database across 7 categories (Mathematics, Science, English, Bahasa Melayu, Malaysian Knowledge, Computer Science, Game Development) structured into 3 difficulty tiers.
- ▶ Created UI/UX flowboards for the in-game interface, including a diegetic chalkboard HUD, live score display, and accessible pause functionality.

Library Management System — Borrowing Module — *C / C++ (Console-Based)*

- ▶ Built a console-based Library Borrowing System in C/C++ for UTeM Workshop I, implementing both Admin and User modules with full CRUD functionality.
- ▶ Admin features: secure login, manage users (add/view/update/delete), manage books, view borrowed books, and generate reports (total users, books, and borrowing statistics).
- ▶ User features: account management, book search (by title, author, genre), borrow and return with automated due date tracking, overdue penalty calculation, and borrowing history.
- ▶ Implemented menu-driven navigation with looping control flow and hardened input validation throughout.

Blind Test System — QA Automation Tool — *Python, Django, Bootstrap 5, MySQL*

- ▶ Developed during industrial training at Top Glove Sdn. Bhd. to automate a manual quality-assurance blind testing process.
- ▶ Built with a Python Django backend, Bootstrap 5 responsive frontend, and MySQL database, deployed internally for QA department use.
- ▶ Reduced manual effort in recording and calculating blind test results, improving accuracy and processing speed for the QA team.

SVC Global Company Website — *HTML, CSS, JavaScript*

- ▶ Designed and developed a professional company website for SVC Global (an Astro broadcast affiliate) as part of the Marketing Executive role.
- ▶ Built using HTML, CSS, and JavaScript; focused on brand presentation, service communication, and user-friendly navigation.

Biometric Attendance & Payroll System — *PHP / MySQL / HTML*

- ▶ Diploma final year project: developed a system to automate employee attendance tracking using biometric fingerprint scanning.
- ▶ Implemented overtime and monthly payroll calculation logic, reducing manual computation errors for administrators.
- ▶ Built an admin dashboard for filtering, viewing, and exporting attendance records.

EXTRACURRICULAR & LEADERSHIP

- ▶ Secretary Committee (AJK Kesetiausahaan) — Politeknik Mersing (2020)
- ▶ Library Friends Club Committee (AJK Kelab Rakan Pustaka) — Politeknik Mersing (2020)
- ▶ Pongal Celebration Committee (AJK Majlis Pongal) — Politeknik Mersing (2020)
- ▶ Facilitator — Fun Run Politeknik (2020)
- ▶ Participant — Motivation Programme, Battle Box, Merentas Desa Cross-Country (2018–2020)

RECOGNITION & AWARDS

- ▶ Dean's List Award — Politeknik Mersing (2 consecutive semesters)
- ▶ Successful Completion of Industrial Training — Top Glove Group of Companies (Aug 2022)
